COMMUNITY CLASSROOM

The Whatcom County Tech Prep Consortium hosts several curricular programs that are available to high school students through an inter-district agreement established by the school partners. During the spring of each year, a limited number of spaces in each program are made available through a competitive application process. To learn more about each program, please contact your school guidance counselor or career specialist for application details. You can also view/download information about each program by clicking on the links below. Application information and deadlines for each program is updated to the system between February and March of each school year.
